Questionnaire Key

Skip Patterns:

1. Simple skip patterns are identified with an arrow immediately following a response option, as in the example below:

A8A.

Is your program for profit, not for profit, or is it run by a government agency?

1. FOR PROFIT → SKIP TO A9
2. NOT FOR PROFIT
3. RUN BY A GOVERNMENT AGENCY
4. OTHER, SPECIFY: _____

2. More complex skip patterns are identified with a bordered box, as in the example below. Skip Logic Boxes are titled in **bold** and numbered using the following naming convention: [Section]_S_[Sequential count].

Skip Logic Box A_S_1:

IF A8A = 1 OR 2 ("FOR PROFIT" OR "NOT FOR PROFIT"), ASK A9

ELSE, SKIP TO A11.

Loops:

A loop is a series of questions that are asked iteratively about one or more entities, for example, a series of personal characteristics asked about each child in the household. The loop's questions appear once in the questionnaire, with skip instructions that indicate when the series starts and ends and for which entities the loop is asked. Sometimes one loop is nested within another.

1. Loop patterns are identified with a broken-line bordered box, as in the example below. All loops are bookended with a boxes designated as 'Start of...' and 'End of...' Loop. Loop boxes are titled in *italics* and numbered using the following naming convention: [Section]_L_[Sequential count].

*Start of B_L_1 Loop (*BL1):*

REPEAT B1_5 – B1_5H FOR EACH AGE GROUP = 1 (HAVE A RATE IN B1_3A)

2. All questionnaire items within a loop are identified with a truncated loop title, preceded by a '*' and formatted in *italics* with blue font. A single questionnaire item may be included in none, one, or multiple loops and will be identified accordingly in the questionnaire with zero, one, or multiple loop titles.

B1_5C. **BL1*

How many hours per week does that cover?

Variable names:

Variables in public-use data files are identified throughout the questionnaire, as in the examples below. Raw variables are prefixed with a "RV:" and formatted with orange font. Derived variables are prefixed with a "DV:" and formatted with green font. For a more detailed explanation of raw and derived variables, please refer to Section 3 of the User's Guide. Raw variables are generally listed once next to the questionnaire item used as their source. Derived variables are listed next to all the questionnaire items used as sources. For example, if a derived variable uses two questionnaire items as sources (e.g. one as numerator and one as denominator), the name of that derived variable will be identified next to each of these two questionnaire items.

B6. RV: CB9_SCHDL_WKS_PER_YEAR

How many weeks per year does your program provide care for children under age 13?

_____ Number of weeks

B5c. DV: CB9_SCHDL_VARY_PAY; DV: CB9_SCHDL_FLEX_HRS

Does your program permit parents to pay for and use varying numbers of hours of care each week?

1. YES, AT THEIR CONVENIENCE
2. YES, FROM A SET OF SCHEDULE OPTIONS
3. YES, BEYOND A MINIMUM NUMBER OF HOURS
4. NO → SKIP TO B6

Ranges:

Numeric open-ended responses throughout the questionnaire, such as number of years or weeks, have a pre-assigned lower and upper limit in the computerized questionnaire to minimize error. These ranges are shown directly beneath such open-ended responses, as in the example below. Ranges are prefixed with "RANGE:" in all caps and formatted with purple font.

B5d.

How many of the children in your program have variation in the number of paid hours of care each week?

_____ Number of children

RANGE: 0-999

Programmatic fills:

Some questions have customized text that is programmatically filled during computerized administration. A descriptor of the customized text is indicated, and users can tell that customized rather than generic text was visible during the interview because the text is bracketed and in CAPS. Programmatic fills within the questionnaire are contained within brackets [...], as in the example below. The fill text within the brackets provides a brief description of what the fill is.
